COUNTY *of* KINGS

## **Regional Desludging Update: Truck Traffic on Jones Road in New Minas to Continue into November**

**October 10, 2023**

Important work is underway to address concerns about foul odours at the Regional Sewer Treatment Plant in New Minas.

Sludge is being removed from the site into mid-November.

**As a result, there will be an increase in truck traffic crossing the Harvest Moon Trail at Jones Road in New Minas from 6 a.m. to 12 noon, Monday to Saturday until the project completion date of Nov. 10.**

It is possible there will be temporary periods of foul odour during the desludging process. The Municipality of the County of Kings and its Regional Partners supporting treatment plant operations apologize for any frustration or inconvenience this may cause.

The treatment plant services most homes and businesses between Greenwich and Coldbrook. It is funded under partnership agreements between the Municipality, Village of New Minas, Town of Kentville, and Pepsico.

For more information about how the ongoing multimillion-dollar upgrades will improve odour management systems at the Plant, visit [www.countyofkings.ca/regionalsewerupdates](http://www.countyofkings.ca/regionalsewerupdates).
