International Day of Living Together in Peace:

A Message from the Municipality of the County of Kings

May 16 is observed globally as the “International Day of Living Together in Peace.” The designation is to promote diversity, cultural differences, inclusion, anti-racism, non-discrimination and collaboration for peaceful communities.

The International Day for Living Together in Peace is a call to action for governments, non-governmental organizations, community groups and individuals to take action to foster inclusion, belonging and respect.

The Municipality of the County of Kings, through the Strategy for Belonging, formally commits to inclusion, collaboration with community and action developments that are geared toward the goal of “living together in peace.”

The Municipality encourages community to be respectful and to take intentional action to help realize the Municipality’s vision of “a community of communities where all people belong.”

Learn more about the Strategy for Belonging by visiting www.countyofkings.ca/diversity.
