Aylesford Lake Beach Closed Until Further Notice Due to Water Quality

Aug. 20, 2024

Aylesford Lake Public Beach is closed until further notice due to water quality issues.

Water quality is monitored regularly at Aylesford Lake Beach. If test results are above the recommended bacterial counts listed in the *“Guidelines for Canadian Recreational Water Quality” (February 2024)*, the beach will be closed until two consecutive tests show that water quality has improved and bacteria counts are within allowable limits. These tests are conducted to ensure the public beach is safe for swimming.

Access to the Aylesford Lake Public Beach will be restricted during this closure; however, the boat launch will still be accessible.

The Municipality of the County of Kings apologizes for any inconvenience this may cause. The Municipality will share updates on www.countyofkings.ca and the Municipality’s [Facebook](#) and [Twitter](#) accounts.
