

National Energy Code for Buildings (NECB) - FREE Online Training

These training materials cater to different audiences with various levels of experience. For example, any interested persons may take a course that teaches the NECB and there are modules specifically created for different stakeholder groups (available now).

Natural Resources Canada (NRCan) and the National Research Council of Canada (NRC) worked with the Canadian Standards Association (CSA) to create the online materials. Please register through CSA Group's web site in order to get access to each course:

-
- [NECB 2017 – Contractors](#) | online, 4 hours

Tailored specifically for contractors and installers, this four-hour course helps to simplify selected requirements of the NECB 2017 in Division B, Parts 3-8. It details systems, components and equipment covered by Parts 3-8 for energy performance efficiency. It also clarifies the prescriptive path, trade-off path, and performance path requirements.

-
- [NECB 2017 – Designers](#) | online, 4 hours

This online course targets designers, modellers, engineers, and architects. Focused on specific requirements of the NECB 2017 in Division B, Parts 3-8, it details systems, components and equipment covered by Parts 3-8 for energy performance efficiency. It also provides recommendations and tips from design experts in the building and energy efficiency sectors.

-
- [NECB 2017 – Navigating and Applying the Code](#) | online, 20 minutes

This 20-minute eLearning course outlines how the NECB is structured and provides an overview of the flow of the document.
