

Airport Map

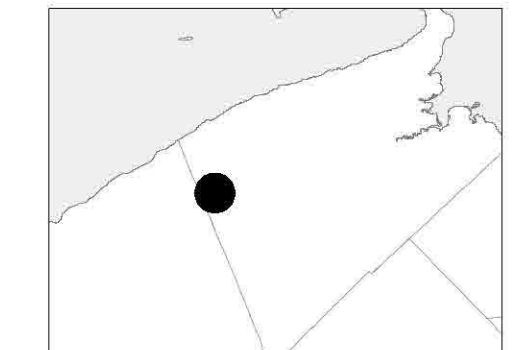

14 Wing Greenwood

Noise Exposure Forecast

Schedule G2

35 N.E.F. (Noise Exposure Forecast) Contour Area
 19 Runway Number

"Transport Canada uses a Noise Exposure Forecast (NEF) system to provide a measurement of the actual and forecasted aircraft noise in the vicinity of airports. This system factors in the subjective reactions of the human ear to specific aircraft noise stimulus: loudness, frequency, duration, time of occurrence, tone, etc." - Transport Canada

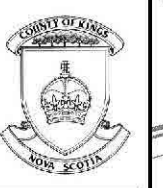

1:22,000

500 0 500 1,000 Meters
 2,000 0 2,000 4,000 Feet

This map is a graphical representation of property boundaries and Municipal boundaries. It is not a survey and is not intended to be used to calculate exact dimensions or area.
